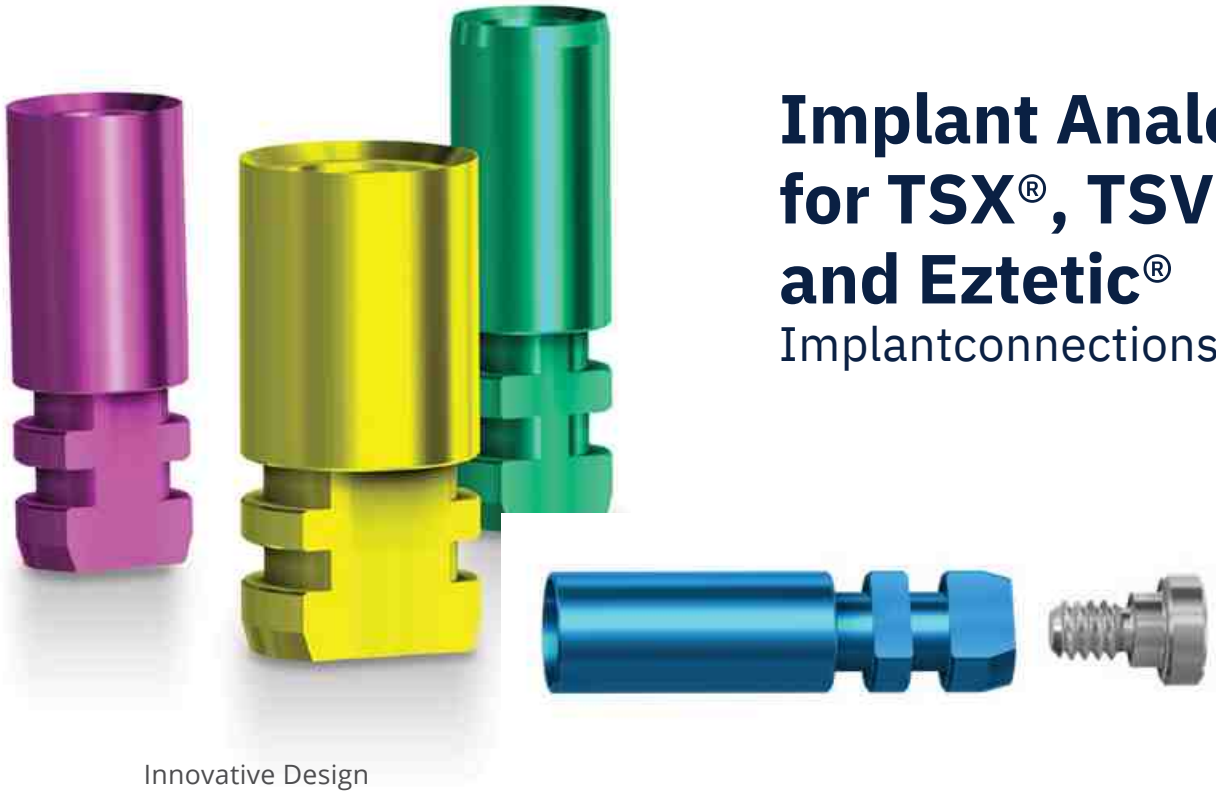
Stability and confidence
in your digital workflow



Implant Analogs for TSX®, TSV®, and Eztetic®

Implantconnections

Innovative Design

Each Implant Analog utilizes self-locking and anti-rotational features for greater stability. When used in 3D-printed models, a single fixing 1.27 mm hex screw is included, ensuring the analog is securely attached allowing accurate positioning.

Precise Matching Connection

TSV Implant Analogs are color-coded to match the platform and are manufactured in titanium alloy. Analogs can be placed in traditional stone and 3D models using the same tooling that you are familiar with for TSV.

Implant Analogs for TSX and Eztetic Implant Systems

Color-coded by implant platform

Implant Platform	Item No.
NP (2.9 mmD)	NPILA-29
3.5 mmD	ILATSV35
4.5 mmD	ILATSV45

Implant Analogs for TSV Implant Systems

Color-coded by implant platform

Implant Platform	Item No.
3.5 mmD	ILATSV35
4.5 mmD	ILATSV45
5.7 mmD	ILATSV57
