Temporary Abutments
For your provisional restorations

All on X Screws

Definitiveconnectionsforsuperstructures

- Higherpre-load between the structure and the multi-unit abutment providing less screw loosening
- Flatseatdesign allows better control of the screw positioning when tightened
- Workswithanymaterial – Temporary, metal or zirconia prostheses

azure™

BellaTek® CAD/CAM Abutments and Bars

BellaTek CAD/CAM Abutments

Customizedrestorations that areexclusively designed to match each patient's tooth anatomy, producing a natural emergence profile through the soft tissue.

BellaTek Bars and Frameworks

Customizedrestorations that provideoptimal laboratory procedures for implant overdentures, fixed hybrid prostheses, and fixed prostheses.

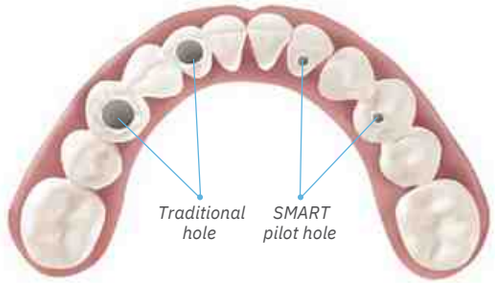
Smart Denture Conversions

Convert a stronger provisional denture in less time



SMART DENTURE CONVERSIONS
Work Smarter.

Conventional Conversions X

- 2+ hours to process
- Significant fracture rate
- Damage to occlusal surfaces
- Poor aesthetics
- Less flexibilty for surgical and restorative team

Smart Denture Conversions V

- Decreased chair time to 30 minutes
- Improves productivity
- Improves profitability
- Stronger temporary acrylic bridge
- Decreased fracture rate
